São Bernardo do Campo - SP, Brazil

GOAL

Seeking to work as a Developer in the areas of Data Science, Computer Vision, and Artificial Intelligence.

ABOUT ME

Graduated from Centro Universitário FEI, currently pursuing a Master's degree. I have experience in projects focused on Image Processing and Artificial Intelligence development.

TECHNICAL SKILLS

- Python, C, C++, C#, HTML, CSS, LaTeX
- VSCode, Antigravity, Google Colab, Jupyter, Github
- Windows, Linux

LANGUAGES

- Portuguese - Fluent
- English - Advanced
- Spanish - Basic

EDUCATION

BACHELOR'S DEGREE IN COMPUTER SCIENCE

Centro Universitário FEI (Jul/2021 - Jul/2025)

Software Development, Mathematical and Computational Foundations, Infrastructure and Systems, Technologies and Applications, Management and Business Vision.

MASTER'S DEGREE IN ELECTRICAL ENGINEERING

Centro Universitário FEI (Oct/2025 - Oct/2027: in progress)

Artificial Intelligence and Machine Learning, Data Science and Statistical Analysis, Pattern Recognition and Computer Vision, Research and Development.

EXPERIENCE

AI DEVELOPER: DE-MLP

Undergraduate Research - FEI (Feb/2024 - Feb/2025)

- Research focused on automatic kidney stone detection using Data Science and Artificial Intelligence.
- Creation of a model capable of identifying kidney stones with high accuracy and good generalization ability across different medical image acquisition sources.
- Developed and trained neural network models for kidney stone detection in computed tomography scans, applying data preparation techniques in Python.
- Achieved 99.6% detection accuracy, obtaining high generalization capability across different databases with significantly low computational cost.

SOFTWARE DEVELOPER: CEVA-FEI

Extension Project - CEVA Logistcs & FEI (Feb/2023 - Feb/2024)

- Project focused on extracting tire information through Computer Vision and Artificial Intelligence.
- Worked on developing solutions for text detection and extraction on tires during logistics operations, supporting data flow, modeling, and implementation.
- Developed a tire text extraction application using computer vision in C++, training and implementing neural networks in Python, along with preparing datasets in Roboflow.
- Contributed to an integrated solution capable of automating tire information detection and extraction during truck unloading operations.
